

RAGHU AMUDALAPALLI

Irving, TX 75038 | (813) 330-4066 | raghuarr1996@gmail.com

Professional Summary

As an Identity and Access Management (IAM) Engineer with 7 years of industry experience, I possess expertise in ForgeRock IAM, Okta provisioning, Single Sign-On (SSO), Multi-Factor Authentication (MFA), Active Directory (AD), and Java-based applications. My expertise extends to seamless integrations of various platforms, resulting in enhanced cross-platform user access management and fortified security measures. I bring collaborative experience with product owners, project managers, stakeholders, and subject matter experts, and I am highly proficient in IAM and Role-Based Access Control (RBAC) implementation. With a successful history of delivering tailored IAM solutions, I have consistently elevated user experience while bolstering overall security protocols implementing SAML 2.0, OpenID Connect (OIDC) and LDAP.

Technical Skills

- **Authentication Technologies:** ForgeRock, OKTA, AWS IAM, OpenID Connect (OIDC).
- **Programming Languages:** XML, ReactJS, Java (JSP, Servlet, JDBC, LDAP), Powershell, Groovy.
- **Database Servers:** Oracle DB2, SQL Server, MySQL, PostgreSQL
- **Development Tools:** Microsoft Visual Studio Code, Postman.
- **Cloud Computing Platforms:** Amazon Web Services, Azure AD.
- **Version Control:** SVN, GIT, Github Desktop.
- **Operating Systems:** Windows, Linux, Unix.

Experience

IAM Developer

Jan 2023 to Current

Johnson & Johnson — Jersey City, NJ

- Demonstrated expertise in configuring, customizing, and deploying ForgeRock IAM components to meet complex security requirements with various applications streamlining user access management processes and enhancing security.
- Proficiently installed and configured ForgeRock Identity Platform components, including ForgeRock AM 6.5, DS, IG, and IDM. These installations laid the foundation for robust IAM solutions and seamless user experiences.
- Designed and implemented custom authentication trees using ForgeRock Identity Platform, optimizing user authentication and authorization workflows based on specific use cases, ensuring a seamless user experience.
- As part of the ICAM team, integrating web applications using federation protocols with ForgeRock Open AM and Open IDM utilizing agile (SCRUM) development methodologies. The integrations involved single sign-on technologies such as SAML Federation, Open AM Agents.
- Proficiently integrated ForgeRock Identity Platform with third-party identity providers (IDPs) and Service Providers (SPs) using industry-standard protocols like SAML and OIDC.
- Strong experience in creating policies to refine the access so that only some users can reach specific areas as per requirements on Open AM.
- Collaborated with application developers to embed ForgeRock authentication and authorization mechanisms directly into web and mobile applications, enhancing security and user experience.
- Implemented user provisioning and deprovisioning workflows across financial

applications, enhancing operational efficiency while adhering to strict security standards.

- Proficiently configured multi-factor authentication (MFA) mechanisms within ForgeRock IAM, adding an extra layer of security to financial applications and data.
- Successfully executed data synchronization between Active Directory and LDAP via ForgeRock OpenID.
- Developed and implemented IAM policies, procedures, and governance frameworks to enforce access controls, role-based access control (RBAC), and least privilege principles across the organization.
- Maintained detailed documentation of ForgeRock IAM configurations, policies, and procedures. This documentation aided in system maintenance, troubleshooting, and knowledge sharing within the team.

IAM Engineer

Oct 2021 to Dec 2022

Inspire Brands — Atlanta, GA

- Designed SAML 2.0, O-Auth, and OIDC patterns to secure user application access and APIs for workforce and customer identity applications.
- Developed custom workflows via HTTP Raw cards to manage user LCM processes for cloud-compatible apps with REST APIs.
- Designed and implemented identity governance processes using ForgeRock Identity Cloud, including user certification, access request and approval workflows, and policy enforcement.
- Installed and configured ForgeRock's OpenAM and OpenIDM in client environments, including the creation of data stores and the setup of network infrastructure.
- Managed the ongoing operation and maintenance of ForgeRock Identity Cloud solutions, ensuring high availability and performance for clients, utilizing monitoring and management tools such as AWS CloudWatch and Azure Monitor.
- Deployed OpenAM and OpenIDM in high-availability environments, ensuring that the identity and access management systems were always available and accessible to users.
- Collaborated with cross-functional teams to integrate IAM APIs into enterprise systems, such as HRIS and SSO solutions.
- Creating and managing application integrations for Identity and access management, Having experience in creating conditional access policies Multifactor authentication (MFA), Resetting MFA and resolving MFA issues.
- Involved in requirements gathering discussion with IAM and helped them utilize the ForgeRock OpenIDM module.
- Engaged in deploying CyberArk Privilege Cloud Connector to manage application system accounts, API bind accounts, and non-human accounts.
- Designed OIDC flows around the enterprise for Homegrown applications and helped in reducing the footprint of applications and reduced the SCIM connections.
- Built Joiner, Mover, and Leaver workflows to maintain user accounts.
- Construct Policies, Roles, and Certifications for governance compliance.

IAM Engineer

May 2017 to Jul 2021

Vistra Energy — Irving, TX

- Expert in developing, putting into practice, and managing Identity and Access Management (IAM) systems to provide effective and safe access control.
- Practical experience addressing a range of organizational needs using industry leading IAM technologies, such as SailPoint and ForgeRock.
- Comprehensive understanding of Identity Gateway, OpenAM, and OpenDJ, among other ForgeRock suite components.
- Federation, SAML 2.0, OAuth 2.0, Single Sign-On (SSO), and OIDC protocols have all been successfully implemented on ForgeRock. - substantial SailPoint Identity Now installation, configuration, and customization expertise.
- Designed and put into place SailPoint's Role-Based Access Control (RBAC) methods for efficient access management.
- Exhibited expertise in cloud platform integration with IAM solutions, guaranteeing

- smooth access control in hybrid settings.
- Developed IAM services for AWS, Azure, and Google Cloud, among other major cloud providers.
- To enforce least privilege access and simplify access management, RBAC frameworks were designed and put into place.
- Worked together with interested parties to create RBAC policies that complied with organizational security and legal standards.
- Improved identity management procedures by utilizing a variety of IAM tools and technologies.
- Utilized proficiency with products like CyberArk, Ping Identity, and Okta to provide thorough IAM coverage.
- Protected sensitive data by implementing and promoting security best practices inside IAM frameworks.

Education and Training

Master of Science, Information Sciences

Jul 2023

Trine University — Angola, IN

- 3.95/4.0 GPA
- **Course Work:** CyberSecurity, Network Management, Database Management, Object Oriented Programming in Java, Advanced System Analysis and Design, Data Mining and Data Visualization, Data Science and Big Data.
- **Academic Projects:**

Music Prediction System (MS Azure Machine Learning): Leveraged Azure Machine Learning Studio to build models on Spotify's API data using classification algorithms to predict the target variable based on independent variables. Engineered the models by tuning the parameters and regularizing to maximize the accuracy.

Student Car Rental Database Design & Implementation (SQL): Modelled ER diagrams using Visio, created tables, and populated data into them while managing database integrity, data generation and loading. Query writing to fetch data, performance tuning using indexes and parallelism. Generated business reports using Tableau for various functionalities.

Bachelor of Science, Computer Engineering

Jul 2017

Acharya Nagarjuna University — India
