

SANKAR INNAMURI

Dallas, TX 85001 | (813)-304-3903 | innamurichandu92@gmail.com

Summary

Cybersecurity professional with over 5 years of experience in Security Operations Center (SOC) and customer success roles. Proficient in using advanced SIEM tools, threat intelligence, and incident response strategies. Demonstrated success in enhancing client satisfaction, maintaining compliance, and optimizing security operations. Adept at managing cloud security, networking, and server-client infrastructure, with a strong understanding of TCP/IP, DNS, and networking concepts. Skilled in handling Windows, Linux, and macOS, with expertise in computer forensics, automation of security workflows, and deploying endpoint detection and response (EDR) solutions.

Skills

- **SIEM Tools:** Splunk, QRadar, Azure Sentinel, AlienVault, LogRhythm
- **Vulnerability Scanning:** Nessus, Nmap, Rapid7
- **Endpoint Security:** HIPS, HDLP, CrowdStrike Falcon, Proofpoint, Microsoft Defender, Tanium
- **Network Security:** IDS, IPS, NGFW, WAF, TCP/IP
- **Scripting & Detection Rule Development:** Python, PowerShell, JavaScript
- **Web Proxy & Content Filtering:** Bluecoat, Websense
- **Operating Systems:** Windows, Linux, macOS
- **Ticketing Systems:** Jira, ServiceNow
- **Security and Threat Hunting Tools & Frameworks:** OWASP ZAP, MITRE ATT&CK Framework, Wireshark (IDS/IPS), SAST, DAST, IAST
- **Data Visualization & Analysis:** Tableau, Power BI, SQL, Pandas
- **Networking Devices & Services:** Switches, Routers, Exchange, File Servers

Experience

Security Consultant Amazon.Inc Environment: Splunk ES, IBM QRadar, FireEye HX, CrowdStrike Falcon, Tenable Nessus, Proofpoint, Acunetix, Azure, AWS, Python, Jira, and IBM Resilient.	12/2023 to Current Dallas, TX
• L2 Role in a 24/7 SOC: Oversee the monitoring and analysis of security events and incidents, leveraging advanced SIEM tools (Splunk, QRadar, Sentinel) and threat intelligence platforms. • Analyzed a variety of network and host-based security appliance logs (Firewalls, NIDS, Syslogs, EDR Logs, etc.) To determine the appropriate remediation actions and escalation paths for each incident, use tools such as Carbon Black, Splunk, and Microsoft Defender. • Led comprehensive investigations into security incidents, including phishing; conducted root cause analysis; and implemented preventive measures to mitigate future risks. • Implemented security controls and intrusion detection using GuardDuty, Inspector, VPC Flow Logs, CloudWatch, and CloudTrail to monitor user activity and logins. • Utilized the CrowdStrike Falcon platform to investigate and respond to potential security incidents, prioritizing Indicators of attack (IOA) and compromise (IOC). • Analyzed threat patterns on various security devices and validated false positives and true positive security incidents. • Identified and blocked over 1,000 phishing emails by scrutinizing email headers for spoofing, examining URLs and attachments through static and dynamic analysis, and following SOC playbooks. • Performed security testing using vulnerability assessment tools, such as Nessus and Nmap. • Boosted threat detection by 20% through effective use of Splunk SIEM for monitoring and response. • Conducted vulnerability assessments and fine-tuned security policies, streamlining response time, and ensuring organizational compliance. • Coordinated with internal stakeholders and incident response teams to contain and mitigate security incidents effectively. • Developed and implemented highly efficient incident response procedures (SOPs) and playbooks, reducing incident response time by 12%. • Recognized attacker tactics, techniques, and procedures (TTPs) as potential IOCs to improve monitoring, analysis, and incident response. • Secured cloud environments in AWS, Azure, and GCP. • Implemented multi-factor authentication (MFA) for all O365 users, enhancing overall account security. • Coordinated with various departments to ensure compliance with regulations and standards, such as HIPAA, PCI, SOX, and	

GDPR.

- Strengthened compliance by addressing Data Loss Prevention (DLP) alerts and protecting sensitive data

SOC Analyst

01/2019 to 07/2021

Wells Fargo

- **Worked in a 24/7 SOC** using Splunk and the ServiceNow (SNOW) ticketing tool.
- Monitored and analyzed Active Directory logs using IBM QRadar SIEM, enhancing detection capabilities.
- Monitored security events from various SOC entry channels (SIEM, tickets, email, and phone) based on the severity of the security event.
- Successfully analyzed, escalated, and assisted in the remediation of over 100 critical phishing email security incidents by following detailed processes and procedures.
- Utilized the CrowdStrike Falcon platform to investigate and respond to potential security incidents, prioritizing Indicators of Attack (IOA) and Indicators of Compromise (IOC).
- Ensured effective incident response and threat mitigation by leveraging Splunk Enterprise Security to triage and investigate notable events.
- Conducted in-depth analysis of logs, system events, and network traffic to identify signs of compromise (IOCs).
- Collaborated with the vulnerability management team to ensure timely patching and remediation of vulnerabilities.
- Enhanced detection capabilities and conducted proactive threat hunting for Active Directory attacks.
- Implemented security controls, policies, and procedures to protect client data and applications.
- Escalated incidents to managed service support teams or tier 2 information security specialists for further investigation and resolution.
- Ensured the confidentiality of PHI, PII, and BII through Data Loss Prevention (DLP) monitoring.
- Ensured the integrity and protection of networks, systems, and applications by enforcing organizational security policies through monitoring and vulnerability scanning.
- Used vulnerability assessment tools, such as Nessus and Nmap, to perform security testing.
- Developed advanced queries and alerts to detect adversary actions.

Associate Consultant

06/2017 to 11/2018

Mastercard

- **L1 Role in a 24/7 SOC:** Proactively searched for signs of advanced threats and security weaknesses using SIEM tools like Splunk and Azure Sentinel.
- Analyzed and responded to security threats from EDR, NGFW, SIEM, IDS, IPS, AV, NAC, and other security data sources.
- Documented incident response activities and provided recommendations for improving processes.
- Collaborated with perimeter and endpoint teams to detect malware, hackers, bots, and other security issues.
- Monitored security systems and diagnosed malware events to ensure uninterrupted service. Identified threats, phishing attacks, and infections.
- Prioritized and triaged security alerts based on severity and potential impact.
- Escalated critical security incidents to appropriate teams for further investigation.
- Integrated threat intelligence into security monitoring and analysis.
- Developed and maintained incident response plans and procedures for Azure environments and Microsoft Defender.
- Executed threat hunting strategies using Azure Sentinel's capabilities and KQL queries.
- Ensured compliance with regulations and standards such as HIPAA, PCI, SOX, and GDPR.

Education

Master of Science: Computer Applications

05/2023

University of South Florida

Tampa, FL

Certifications

- Certified in Ethical Hacking (CEH) | Security+ | Certified Information Systems Auditor (CISA) | Azure cloud (Az-900)

Accomplishments

- Received recognition for successfully completing a penetration testing project for a reputed hotel in Dubai, identifying critical vulnerabilities in their network and significantly reducing the risk of a potential breach.
- Maintained a continuous learning approach and contributed to industry-specific threat analysis
